Jan. 10, 2000

Dear Ms. Dixon

I'm writing in opposition to "Mobile Chernobyl"--the plan to ship nuclear wastes across the country to Yucca Mountain. The stuff should remain where it is and be covered with some inert substance like cement. It could be checked periodically for cracks and recemented when necessary.

In view of all the reckless drivers on the highways, the DOE would be asking for trouble to ship nuclear wastes across the country. In addition, serious questions have been raised about the suitability of Yucca Mountain as a storage site.

Sincerely,

Emily B. Calhoun
